### FEATURES

- Anti-restart protection is designed to prevent motor start up in the on-power switch position after a power disruption
- Power light indicates switch failure, cord damage or worn-out motor brushes
- Dust extraction shroud is designed with a 4-spring suspension system and soft brushes which help maintain the shroud flush to the surface at all times
- Dust extraction shroud offers a removable edge cover allowing for flush-to-wall edge grinding
- Rear handle trigger switch with lock-off feature requires two actions to power on
- Zig-zag epoxy applied to the armature coils is designed to protect from harmful debris while maintaining proper heat dissipation for longer life
- Gear housing cover with labyrinth construction seals the drive gear and bearings from dust and debris for increased durability
- Spiral bevel gears for smoother rotations and a more efficient transfer of energy
